

**Alaska Department of
Transportation & Public Facilities**
**Construction Manager / General Contractor:
Parks Hwy MP 319-325 Reconstruction CMGC**
Presented by Jennifer Wright, P.E.

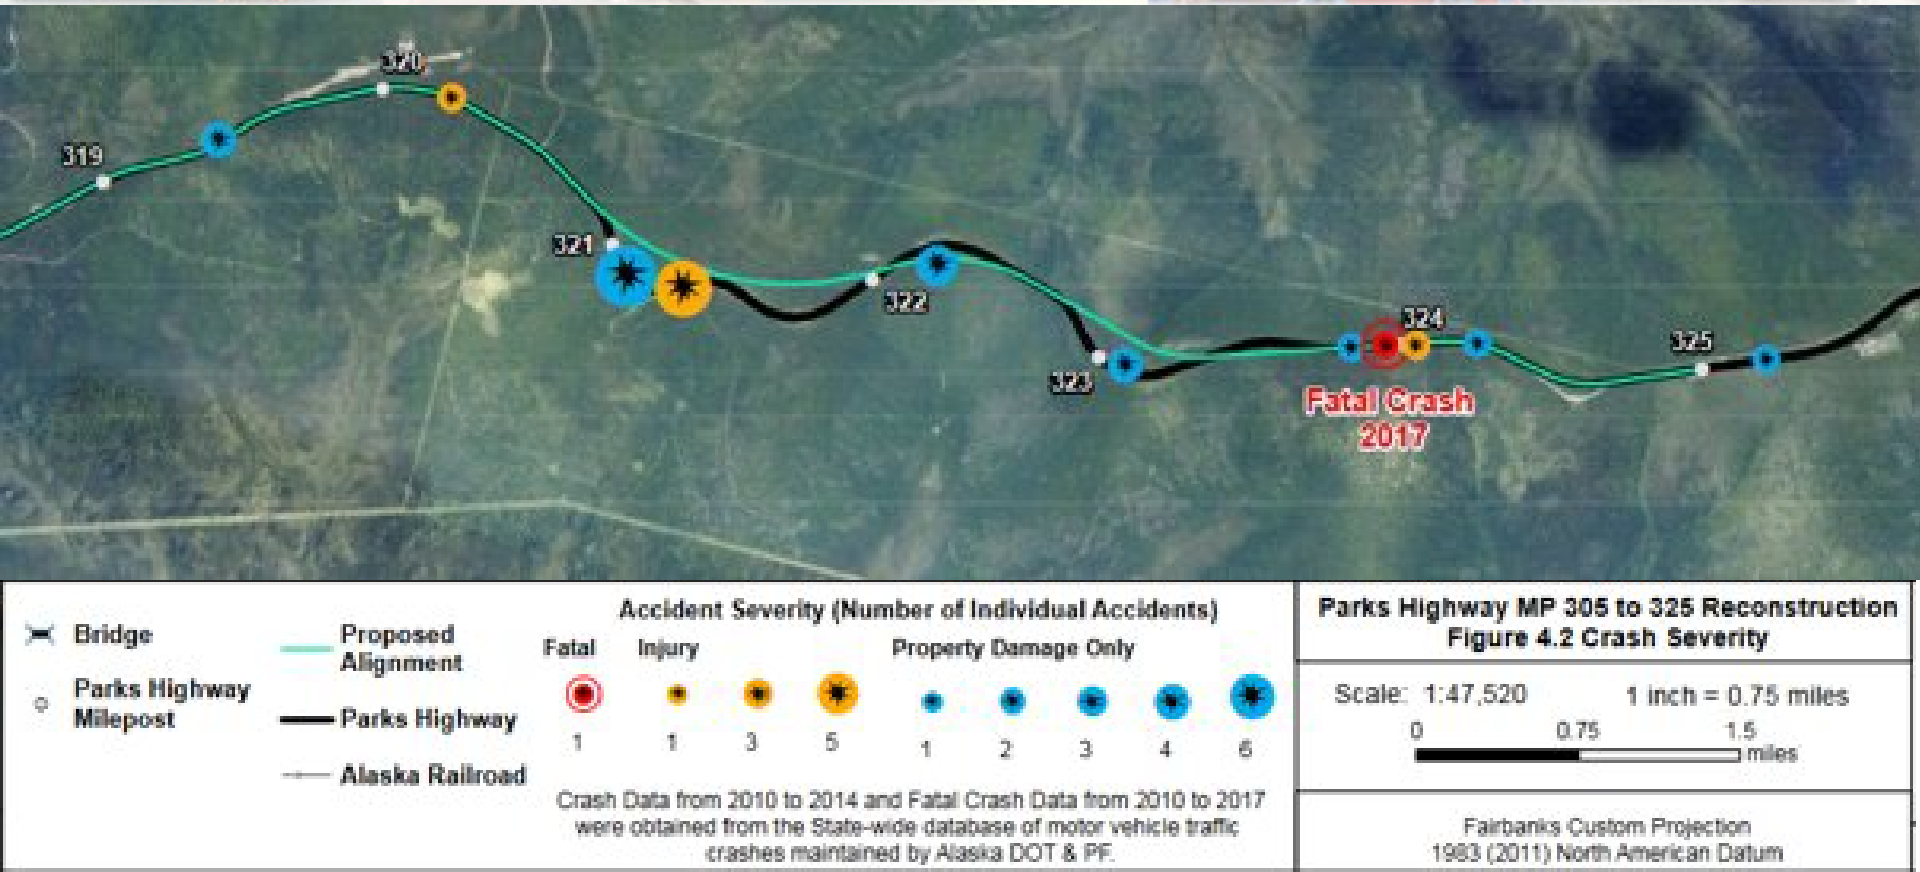

October 4, 2022

Project Scope

- Improvements to deficient roadway geometry such as flattening curves and grades
- Constructing new passing lanes and upgrading existing passing and truck climb lanes to meet current design standards
- Improving drainage through ditching, new culverts, and replacing existing culverts
- Reconstructing and paving approaches, upgrading mailboxes, signing, and striping

Purpose and Need

Provide a transportation facility with improved operational efficiency and safety that maintains or improves mobility and accessibility for people and goods along the existing Parks Highway corridor.

Project Goals

- Minimize traffic impacts during construction. Communicate traffic impacts including delays accurately and within adequate notice times
- Develop construction phasing and material movement plans
- Accurately account for and manage risks, particularly the maintenance of traffic, subsurface conditions, material sourcing, and material disposal placement to ensure a cost-effective and efficient construction project.
- Develop a cohesive and collaborative team with the CMGC, project consultants, ICE, and Department.
- Provide cost certainty to minimize surprise impacts on the Department's overall program.
